PROFESSIONAL SUMMARY

Software Engineer | MERN Stack Developer | Cloud Solutions & Automation Expert

A results-driven software development engineer with **two years of experience** in **full-stack development**, specializing in **JavaScript (ES6+), React.js, Node.js, and NoSQL databases**. Adept at designing and deploying **scalable and efficient** software solutions while working within **Agile environments**. Proven expertise in **cloud computing, microservices, REST APIs**, and modern **front-end technologies** such as **Tailwind CSS, Bootstrap, and Material UI**. Strong background in **automation testing, DevOps fundamentals, and Infrastructure as Code (IAC) using AWS**. A proactive problem solver with excellent communication and **collaboration skills**, eager to contribute to innovative projects that drive business success.

SKILLS

Java	Unit testing	AWS	Postman	JWT
HTML5	Automation testing	MQTT	GitHub	C++
CSS3	Cypress	Socket.io	Vs Code Editor	DSA
JavaScript	MERN	Technical Documentation	JIRA	API Security
SQL	BootStrap	MicroServices	Node.js	Query Optimize
MongoDB	Tailwind CSS	Rest API	React	System Debugging

SELECT ACCOMPLISHMENTS

- ☐ **Resolved 200+ customer cloud-based issues** as a Cloud Support Associate, ensuring client satisfaction by providing timely, accurate solutions and enhancing overall customer experience.
- ☐ **Contributed to the award-winning alcohol detection project** by independently handling socket and MQTT connections, playing a pivotal role in the project's success at the Delhi Showcase.
- ☐ **Managed and maintained portal features** in collaboration with the IoT team, implementing new functionality based on client requirements and feedback, which contributed to enhanced user experience.
- ☐ **Played a key role in project delivery**, ensuring the smooth integration and deployment of multiple software solutions, meeting project timelines and contributing to team success.

PROFESSIONAL EXPERIENCE

Cloud Support Associate, Amazon Web Services-Amazon

Aug, 2024-Present

- Resolved cloud-based issues for 200+ customers, ensuring client satisfaction through accurate and timely solutions.
- Enhanced cloud management by gaining proficiency in AWS IAC (Infrastructure as Code).
- Collaborated with cross-functional teams to integrate feedback and ensure high-quality solutions.
- Developed strong communication and ownership skills through direct customer interaction and issue resolution.

Full Stack Developer, Starkenn Technologies

June, 2023-Aug, 2024

Starkenn Technologies, a startup with headquarters in Pune, India, is developing an ADAS system to track vehicle activities in the mining industry.

- Managed and maintained the portal, collaborating with the internal IoT team to gather requirements and implement new features.
- Worked independently on the alcohol detection project, handling socket and MQTT connections, contributing to the startup's award at the Delhi Showcase.
- Played a key role in delivering multiple projects, ensuring smooth integration and deployment.
- Collaborated effectively with cross-functional teams to meet project goals and deadlines, driving successful outcomes.

Frontend Intern, Digilytics

Mar, 2022-June, 2022

- Led front-end development for a web application, designing and delivering 14 UI screens in a single day, showcasing exceptional time management and prioritization skills.
- Coordinated the integration of Firebase authentication, contributing to secure user login processes and enhancing overall application security.
- Consistently met project deadlines while maintaining high-quality standards, ensuring the successful delivery of features and an optimized user experience.

PROFESSIONAL PROJECTS**HealthCare Industry Solution**

- Developed cost-optimized AWS architecture for the healthcare sector.
- Collaborated with clients to design scalable, future-proof solutions.
- Implemented flexible cloud infrastructure to meet evolving needs.
- Ensured long-term scalability of solutions for business growth.

Fleet Management System

- Integrated Google Maps API for real-time data visualization.
- Implemented dynamic markers with MQTT and Socket.io.
- Led alcohol detection portal development, presented at an exhibition.
- Showcased problem-solving skills in project delivery.

Sports Management System

- Designed a sports management platform for university use.
- Managed player data, trial updates, and tournament results.
- Used MongoDB for database management.
- Ensured seamless user experience for students and staff.

FREELANCING PROJECTS**E-Learning platform**

- Led a team of 4 to develop an eLearning platform in 3 months.
- Focused on front-end development with React for smooth UI/UX.
- Managed project execution, ensuring timely delivery and cost optimization.

E-fitness Platform

- Developed frontend for a fitness tutorial and medicine sales platform using React.
- Managed tech team, ensuring seamless feature integration and project execution.

EDUCATION**Bachelor's of Technology in Computer Science and Engineering - 8 CGPA**

MIT World Peace University

SSC - 76%

Saint John's Senior Secondary School

CERTIFICATION**HackerRank - Java**<https://www.hackerrank.com/certificates/c29f5b8fa4e3>**HackerRank - React**<https://www.hackerrank.com/certificates/d050e63647a8>

HackerRank - Problem Solving
